## Question 7

(a) (i) Air is pumped into a spherical exercise ball at the rate of $250 \mathrm{~cm}^{3}$ per second. Find the rate at which the radius is increasing when the radius of the ball is 20 cm . Give your answer in terms of $\pi$.

(ii) Find the rate at which the surface area of the ball is increasing when the radius of the ball is 20 cm .

(b) The inflated ball is kicked into the air from a point $O$ on the ground. Taking $O$ as the origin, $(x, f(x))$ approximately describes the path followed by the ball in the air, where

$$
f(x)=-x^{2}+10 x
$$

and both $x$ and $f(x)$ are measured in metres.
(i) Find the values of $x$ when the ball is on the ground.

(ii) Find the average height of the ball above the ground, during the interval from when it is kicked until it hits the ground again.
