## Question 6

A local sports club is planning to run a weekly lotto. To win the Jackpot of $€ 1000$, contestants must match one letter chosen from the 26 letters in the alphabet and two numbers chosen, in the correct order, from the numbers 0 to 9 . In this lotto, repetition of numbers is allowed (e.g. M, 3, 3 is an outcome).
(a) Calculate the probability that $\mathrm{M}, 3,3$ would be the winning outcome in a particular week.

(b) If a contestant matches the letter only, or the letter and one number (but not both numbers), they will win $€ 50$. Using the table below, or otherwise, find how much the club should expect to make or lose on each play, correct to the nearest cent, if they charge $€ 2$ per play.

| Event | Payout $(x) \quad €$ | Probability (P(x)) | x.P(x) |
| :--- | :--- | :--- | :--- |
| Win Jackpot |  |  |  |
| Match letter and <br> first number only |  |  |  |
| Match letter and <br> second number only |  |  |  |
| Match letter and <br> neither number |  |  |  |
| Fail to win |  |  |  |

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

(c) The club estimates that the average number of plays per week will be 845 . If the club wants to make an average profit of $€ 600$ per week from the lotto, how much should the club charge per play, correct to the nearest cent?
