

# Leaving Certificate 2022

## Mathematics

### Higher Level

### Paper 2

### Marking Scheme

## Structure of the marking scheme

Candidate responses are marked according to different scales, depending on the types of response anticipated. Scales labelled A divide candidate responses into two categories (correct and incorrect). Scales labelled B divide responses into three categories (correct, partially correct, and incorrect), and so on. The scales and the marks that they generate are summarised in this table:

Scale label	B	C	D	E
No of categories	3	4	5	6
5-mark scale	0, 2, 5	0, 2, 3, 5		
10-mark scale		0, 3, 7, 10	0, 3, 5, 8, 10	
15-mark scale			0, 4, 8, 12, 15	0, 3, 6, 9, 12, 15

A general descriptor of each point on each scale is given below. More specific directions in relation to interpreting the scales in the context of each question are given in the scheme, where necessary.

### Marking scales – level descriptors

#### B-scales (three categories)

- response of no substantial merit (no credit)
- partially correct response (partial credit)
- correct response (full credit)

#### C-scales (four categories)

- response of no substantial merit (no credit)
- response with some merit (low partial credit)
- almost correct response (high partial credit)
- correct response (full credit)

#### D-scales (five categories)

- response of no substantial merit (no credit)
- response with some merit (low partial credit)
- response about half-right (mid partial credit)
- almost correct response (high partial credit)
- correct response (full credit)

etc.

In certain cases, typically involving incorrect rounding, omission of units, a misreading that does not oversimplify the work, or an arithmetical error that does not oversimplify the work, a mark that is one mark below the full-credit mark may also be awarded. Such cases are denoted with a \* and this level of credit is referred to as *Full Credit -1*. Thus, for example, in Scale 10C, *Full Credit -1* of 9 marks may be awarded.

The only marks that may be awarded for a question are those on the scale above, or *Full Credit -1*.

A rounding penalty is applied only once in each section (a), (b), (c) etc. A penalty for an omitted unit is applied only once in each section (a), (b), (c) etc. There is no penalty for omitted units if the question specifies the unit to be used in the answer.

In general, accept a candidate's work in one part of a question for use in subsequent parts of the question, unless this oversimplifies the work involved.

Unless otherwise specified, a correct answer without sufficient supporting work is generally awarded the highest level of partial credit (typically *Partial Credit* or *High Partial Credit*, as appropriate).

### Summary of mark allocations and scales to be applied

Section A (120) Answer any four questions		Section B (100) Answer any two questions	
<b>Question 1 (30)</b>	<b>Question 4 (30)</b>	<b>Question 7 (50)</b>	<b>Question 9 (50)</b>
(a)(i) 5C	(a)(i) 10C	(a) 10C	(a) 10D
(a)(ii) 10D	(a)(ii) 10C	(b) 10D	(b) 10C
(b) 5C	(b) 10C	(c) 10D	(c)(i) 5C
(c) 10D		(d)(i) 5B	(c)(ii) 10C
	<b>Question 5 (30)</b>	(d)(ii) 10D	(d)(i) 5B
<b>Question 2 (30)</b>	(a)(i)(ii) 10C	(e) 5C	(d)(ii) 10D
(a) 10C	(a)(iii) 5C		
(b) 5C	(b) 15D	<b>Question 8 (50)</b>	<b>Question 10 (50)</b>
(c) 15D		(a)(i)(ii) 10C	(a)(i) 10D
	<b>Question 6 (30)</b>	(a)(iii)(iv) 5C	(a)(ii) 5C
<b>Question 3 (30)</b>	(a) 15D	(a)(v) (b) 5B	(b) 5C
(a) 5C	(b) 10D	(c) 10D	(c) 10D
(b) 10C	(c) 5B	(d)(i) 10C	(d) 5C
(c) 15D		(d)(ii) 10C	(e) 15E

## Palette of annotations available to examiners

Symbol	Name	Meaning in the body of the work	Meaning when used in the right margin
	Tick	Work of relevance	The work presented in the body of the script merits full credit
	Cross	Incorrect work (distinct from an error)	The work presented in the body of the script merits 0 credit
	Star	Rounding / Unit / Arithmetic error / Misreading	
	Horizontal wavy	Error	
			The work presented in the body of the script merits the relevant level of partial credit ( <i>Partial, Low Partial, Mid Partial, and High Partial</i> respectively)
	F star		The work presented in the body of the script merits <i>Full Credit – 1</i>
	Left Bracket		Another version of this solution is presented elsewhere and it merits equal or higher credit
	Vertical wavy	No work on this page / portion of this page	
	Oversimplify	The candidate has oversimplified the work	
	Work of merit	The candidate has produced work of merit (in line with that defined in the scheme)	
	Stops early	The candidate has stopped early in this part	

**Note:** Where work of substance is presented in the body of the script, the annotation on the right margin should reflect a combination of annotations in the work.

In a **C scale** that is **not** marked using steps, where \* and and appear in the body of the work, then should be placed in the right margin.

In the case of a **D scale** with the same annotations, should be placed in the right margin.

## Detailed marking notes

### Model Solutions & Marking Notes

**Note:** The model solutions for each question are not intended to be exhaustive – there may be other correct solutions. Any Examiner unsure of the validity of the approach adopted by a particular candidate to a particular question should contact his / her Advising Examiner.

Where steps are listed in the Marking Notes, unless otherwise specified, it is to be taken that they can be independently correct / incorrect – that is, in a candidate’s solution, step  $n$  can be considered correct even if previous step(s) have not been correctly presented, as long as the work done to arrive at step  $n$  from the previous step(s) has not been oversimplified. It is specifically noted where this does not hold. Note also that these steps may not need to be presented in the order specified in the Marking Notes.

Where “finishes correctly” is included in the Marking Notes, this is taken to mean: “finishes using the correct method, and the (incorrect) values the candidate has already found”.
